

HEALTH & SOCIAL CARE LEARNING JOURNEY

Level 3 Courses

Health & Social Care
Sociology
Psychology

Year 11

Can I interpret data from key health indicators to be able to inform a health and wellbeing plan?

How can I create a health and wellbeing improvement plan with targets & recommendations and be able to reflect on the plan once put into action?

How will I apply my knowledge to improve someone's health and wellbeing?

How will I develop my knowledge of health and social care services and values?

How will I explore what might stop people from accessing services?

How can I use real life situations or scenarios to assess the health and social care needs of an individual?

How can I explore these different events that can have an impact on the physical, intellectual, emotional and social development of individuals?

How do I know where to go for support when dealing with life events to be able to cope with change?

Why will different factors impact on different aspects of growth and development?

How will I discover how people adapt to life events and make changes?

How can I use real events & situations to explore growth and development across different life stages?

Year 10

How can I recognise positive and negative impacts on an individuals' growth and development and how it affects them?

Speed Check – Data will be taken to see if you need a diversion to your journey or extra support on the road.
